

Composite Fillings

We would like to inform you that our office only makes use of composite (tooth colored) fillings. With today's new technological advances, we feel that these materials are an improvement over amalgam (silver) fillings.

Regrettably, some insurance companies have not updated their coverage's to accommodate these advances. Please contact your insurance company if you have questions as to whether or not the composite fillings are covered under your policy.

Our patients deserve the very best we can offer and we feel that great dental care is based on what is best for your child's dental health.

Thank you for your continued patronage!
